YOUR AVATAR

3

Who Is Your Audience?

To truly understand what your audience wants, you must understand their motivations first. Your avatar has a certain persona, and we are going to break that down. Creating a persona will help you understand what your audience is looking to get from your content.

By segmenting your avatar's persona into 4 sections—demographics, psychographics, online behavior and offline behavior—we can get a better picture of our potential audience and where we must spend the majority of our time when planning content.
